

TECHNICAL SUPPORT SERVICES

Technical Support Services

Providing Residential/business alarm systems form the core of your home/building security. Your alarm system can be set up to accommodate multiple zones to ensure that in the event of a burglary, our control room will immediately be able to identify the exact rooms and outdoor areas of your home that intruders have breached. Several fixed and remote panic buttons can be installed, so that in case of an emergency you can discreetly alert us to respond to the scene straight-away. Every area needs to be professionally assessed to ensure vulnerable points are adequately secured, from the driveway gates, which may need advanced security, to offices, storerooms, production areas, as well as the roof which must not be neglected as it is a fairly common point of entry for burglars.

A tailor-made service of the highest standard. It is highly recommended to have several layers of security to effectively protect yourself and your family. These layers will buy time as an early warning system will alert you of any unwanted intruders. This will give you adequate time to secure your family whilst armed response is on their way.
